TEXTILE POSSESSING ANTILACERATION PROPERTIES

10 Textile (1) possessing antilaceration properties, which
is made from synthetic cables (2) sheathed with a
polymer material, such as polyvinyl chloride, and
includes, in the warp direction and the weft direction,
metal cables (3, 4) sheathed with a polymer material
having a different color from that of the polymer
material for sheathing the synthetic yarns, wherein the
15 warp and weft metal cables (3, 4) are uniformly spaced
by a distance of (d, l) of less than 80 millimeters.
